Missy Smith, founder of **WAKEUP**, is suing the United States Government in a class action lawsuit. This blockbuster film **"Crimes Against Humanity"** is a hard hitting, tell-all documentary explaining the lawsuit which will leave you **BREATHLESS**. In one fell swoop, Missy lays out the premise for suing the United States Government since they have already admitted they are complicit in their support of legalized child killing.

**You too can become a plaintiff in this lawsuit that will bring down the Abortion Industrial Complex!**
